REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior arts fail to teach or fairly suggest a method for transmitting layer 2 protocol data units (PDUs) in a wireless communications protocol, the wireless communications protocol utilizing a transmission time interval (TTI) in which a predetermined number of PDUs are transmitted, the method comprising:

for each PDU, providing the PDU with a sequence number that is greater than the sequence number of an immediately prior PDU by a first predetermined number if no data was discarded between the data held in the PDU and the data held in the immediately prior PDU, and providing the PDU with a sequence number that is greater than the sequence number of the immediately prior PDU by a second predetermined number if data was discarded between the data held in the PDU and the data held in the immediately prior PDU; and providing the PDUs for transmission in the TTI, within the structure of the independent claim 1.

Regarding claim 22, the prior arts fail to teach or fairly suggest a method for determining acceptable ranges of received sequence numbers in a wireless communications protocol, the wireless communications protocol utilizing:

determining a starting sequence number and an ending sequence number for received PDUs within the TTI; and

discarding any received PDU within the TTI that has a sequence number that is sequentially before the starting sequence number or that is sequentially after the ending sequence number, within the structure of the independent claim 22.

Regarding claim 30, the prior arts fail to teach or fairly suggest a wireless communications system comprising:

an interface for generating the starting sequence number and the ending sequence number, and for discarding any received PDU within the TTI that has a sequence number that is sequentially before the starting sequence number or that is sequentially after the ending sequence number, within the structure of the independent claim 30.

Conclusion

2. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Thien Tran whose telephone number is (571) 272-3156. The examiner can normally be reached on Monday-Friday from 8:30AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doris To, can be reached on (571) 272-7629. Any inquiry of a general nature of relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2600.

3. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for
